M-Files Connector for Dynamics EOT Release Notes

Note! This is a license protected version of Dynamics EOT connector. Contact licensing@m-files.com to get a valid license.

Signed M-Files Connector for Dynamics EOT is compatible with M-Files Online - June '22 Update or newer.

Summary of the fixed issues and improvements in this release:

M-Files Connector for Dynamics EOT (23.10.0.2)

Improvement: Dynamics EOT connectors require application license.
Description: Dynamics EOT connectors is now license protected. A valid license is needed to use Dynamics EOT connector and get the latest updates in the future. When the license expires it is not possible to use the connector anymore.

Improvement: FetchXML New Cloud support by enabling to set fetchXML to MFAdmin settings
Description: For New Cloud support added possibility to paste fetchXML to MFAdmin Dynamics connector settings in addition to the old way of adding only folder path to local xml file containing the fetchXML.

Defect: Dynamics 365 Connector certificate expiration not visible to cloud customers
ID: 167685
Symptom: User cannot get information if the certificate has been expired.
Solution: Fixed.

Defect: FetchXML conditions are not used on search results.
ID: 168242
Symptom: When user configure Dynamics EOT Connector and make connection to Dynamics. Then use FetchXML file with conditions as filters to narrow search result. Search results do not follow the FetchXML conditions.
Solution: Fixed.
