Signed M-Files Connector for Network Folders version 23.3.12441.2 is compatible with M-Files Online - June '22 Update or newer.

Summary of the fixed issues and improvements in this release:

M-Files Connector for Network Folders (23.3.12441.2)

Improvement: Improved "An unexpected network error occurred" error message
ID: 164108
Description: Windows shows the error message "An unexpected network error occurred" when a user tries to access a folder whose parent is the Network Folder Connector root, and the user does not have access to it. Now the error situation is treated with an access denied error.

Defect: Smart Search configuration in the external repository settings prevents all searches and indexing
ID: 165871
Symptom: Although not supported, it is possible to configure Smart Search for external repository. As a result, all searches and indexing in the external repository failed with the error message "Preparing search indexes failed"
Solution: Fixed. Smart Search option was hidden from the external repo search options.

Defect: The error message "Error unloading appdomain" written in Windows event log when stopping M-Files Server
ID: 161417
Symptom: Network Folders Connector is in use. When a user stops the M-Files Server service, M-Files Server stops, but sometimes the error message "Error unloading appdomain" is written in Windows event log.
Solution: Fixed.

Defect: Network file Connector creates several versions of the promoted object
ID: 163245
Symptom: If a user promotes a file that start with a dot, Network Folders Connector creates several versions of the document. Also, M-Files Desktop keeps flickering as long as the document is chosen.
Solution: Fixed.

Defect: Search can fail after a file is deleted and recopied
ID: 163097
Symptom: Network Folders Connector is configured for a network drive. When a user copies a file to the network drive, the file is found in search. If the user deletes the file from the network drive and copies the same file again to the network drive, search does not find the file anymore.
Solution: Fixed.
