M-Files Compliance Kit June 2023 Update (23.6.1132.4) Release Notes

M-Files Compliance Kit June 2023 Update and its service releases are compatible with M-Files Online - February '23 Update or newer.

Summary of the fixed issues and improvements in this release:

M-Files Compliance Kit June 2023 Update (23.6.1132.1)

Improvement: Logging support
ID: 167524
Description: M-Files Compliance Kit can now be set to log its behavior. This helps to better understand what it is doing, to troubleshoot interactions between modules, and for other applications and to analyze performance bottlenecks.

Improvement: Setting for reducing informational logging in Log Exporter
ID: 159940
Description: You can now set the Log Exporter module to not create Windows event log entries for specific events.

Improvement: TLS 1.2 support for Log Exporter
ID: 163451
Description: The Log Exporter module now uses TLS 1.2.

Improvement: Quicker access to vaults that use M-Files Compliance Kit
ID: 164053
Description: In M-Files Desktop and M-Files Web, it is now faster to open vaults that use M-Files Compliance Kit.

Improvement: Multi-object actions in Object Creator
ID: 155652
Description: You can now select many objects (for example, documents) and create a single object (for example, a document collection) with the Object Creator module.

Improvement: Extended language support for PDF Processor
ID: 164393
Description: You can now set the PDF Processor module to use extended language support if there are issues with the conversion of non-English Word files to PDF.

Defect: Object Creator buttons shown after a delay
ID: 167301
Symptom: When the user selects a Document object, the Object Creator buttons are shown after a delay.
Solution: Fixed.

Defect: Object creator buttons shown unnecessarily
ID: 167311
Symptom: When the user selects many documents, the Object Creator buttons are shown even if all the selected documents do not match the filtering requirements.
Solution: Fixed.

Defect: Utilities module does not create a new unique sequence
ID: 167038
Symptom: The Utilities module does not always create a new unique sequence. This can cause new documents to get an incorrect sequence number.
Solution: Fixed.

Defect: Calendar application causes slowness
ID: 162217
Symptom: The home screen view of M-Files Compliance Kit takes a lot longer to load when the Calendar application is enabled and set to show objects.
Solution: Fixed,

Defect: Upgrade Vault Structure operation can cause an unclear error message
ID: 160640
Symptom: The Upgrade Vault Structure operation cannot sometimes be completed. An unclear error message is shown instead.
Solution: Fixed.

Defect: Managed Properties cannot edit stub objects
ID: 161627
Symptom: The Managed Properties module cannot sometimes edit stub objects. This error message is shown instead: "The Managed Properties module was unable to edit the property value 'PD.xxx' of the object 'xx' (x-x-x). System.Runtime.InteropServices.COMException (0x80040001): Editing of special objects such as shortcuts and conflicts is restricted. You are not allowed to add, modify, or remove the property 'xxx'."
Solution: Fixed.

Defect: Managed Properties cannot sometimes update auto-calculated properties
ID: 163903
Symptom: The AutoCalculatedProperties functionality does not update the property if only the letter case is changed in metadata.
Solution: Fixed.

Defect: File version check in Log Exporter can cause an uninformative error message
ID: 163048
Symptom: If there is mismatch in file version data and the user tries to save a new version, the operation cannot sometimes be completed. This error message is shown instead: "The action was denied because the property 'File Version' was not updated correctly. To fix the issue, change event handler execution order."
Solution: Fixed.

Defect: Copy rules do not sometimes operate correctly with Object Creator
ID: 164077
Symptom: The "Allow copy (no command button)" copy rule of the Object Creator module does not always operate correctly. This error message is shown instead: "Copying the selected object is not allowed."
Solution: Fixed.

Defect: Deleted documents trigger state change notifications in Advanced Notifications
ID: 164248
Symptom: There is a notification rule set to send an email when the user moves a document to a specific state. If the user after this deletes the document, an email notification is sent incorrectly based on the notification rule associated with the workflow state.
Solution: Fixed.

Defect: Storage format upgrade of unique sequences not done with Compliance Kit December '21 Update
ID: 163822
Symptom: The storage format upgrade of unique sequences is not always done with Compliance Kit December '21 Update. This causes that the sequence values generated before the upgrade start from the beginning. New document creation can thus cause two documents to incorrectly have the same sequence number.
Solution: Fixed.

Defect: PDF Processor uses a lot of memory with Excel files
ID: 166850
Symptom: The PDF Processor uses a lot of memory on the M-Files server during Excel to PDF conversions.
Solution: Fixed.

Defect: M-Files Web home page links contain an extra slash
ID: 166018
Symptom: There is an extra slash at the end of the M-Files Web home page URL received from M-Files API. The slash character must not be in the URL even if the configuration of "M-Files Web home page" setting has a slash at the end.
Solution: Fixed.

Defect: Word to PDF conversion cannot be done for documents that use the track changes feature
ID: 164986
Symptom: The PDF Processor module cannot convert Word documents to PDF when the Word document uses the track changes feature.
Solution: Fixed.

Defect: PDF Processor sometimes converts graphs incorrectly
ID: 163303
Symptom: The PDF Processor module can sometimes cause graphs in a Word document to be converted incorrectly. For example, a label with values can disappear during the conversion.
Solution: Fixed.

Defect PDF conversion can remove font color
ID: 166786
Symptom: Visio document to PDF conversions with the PDF Processor module can cause the font color for some of the texts to change.
Solution: Fixed.

Defect: QMS 8.0 documents cannot always be converted with PDF Processor
ID: 167228
Symptom: The PDF Processor module cannot always convert QMS 8.0 controlled documents.
Solution: Fixed.

Defect: Large error message about incomplete Compliance Kit upgrade in the Hierarchy Manager dashboard
ID: 161743
Symptom: After a failed Compliance Kit upgrade, the Hierarchy Manager dashboard can show a long and obscure error message.
Solution: Fixed.

Defect: Objects not processed correctly by Hierarchy Manager
ID: 165999
Symptom: If, in a multi-select value list, there is an item that does not match the "Acceptable Sibling State Conditions" criteria configuration, the Hierarchy Manager module does not always use the criteria correctly for the rest of the value list items.
Solution: Fixed.
